

## **STUDENTS**

### **Education Stability of Foster Care Students**

The District will ensure that a foster care student can continue as a student in the District (if this District is the last school in which they were formally enrolled as a resident), unless it is determined not to be in the student's best interest and will ensure that the transportation which may be needed is provided or arranged. The Superintendent will designate a person(s) to serve as Foster Care Point of Contact (POC) for the District. The Superintendent, or his/her designee, will develop guidelines to determine what school placement is in the best interests of a student in foster care and for the provision of transportation when continuation in this District continues to be a legal right or is in the best interests of such student.
